

Purchasing policy of WST

Our vision is to redefine the screening industry. Our mission is to strive for valuable partnerships through knowledge and innovation. As our vendor, and as such our valuable partner, we request the highest possible value. We define value as a combination of quality, price, delivery and the service of and around the product.

The success of WST depends in part on the efficiency of our suppliers. On the basis of our purchasing policy we are looking for a long term business relationship with our vendors. You should share in our concept of quality and continuous development of business relations.

The basic requirement for a business relationship is a well-established quality system, flexibility upon request and adherence to promised delivery dates. We aim to provide our customers with environmentally friendly products and your dedication to the same is expected. We would also appreciate to work together with you in continuous development of products and procedures.

Why should you apply for a business relationship?

W.S. Tyler is looking for different kinds of suppliers. Our demand focuses on different categories. As illustrated on our website we are a manufacturer and supplier of vibrating screening machines and also of wire cloth and screening media. We are looking for suppliers which can offer us machine parts (e.g. bearings, side plates, motors or shafts), wire or wire cloth (e.g. high carbon, stainless steel, galv.), services and MRO (Maintenance, Repair and Operations) supplies.

Please take this opportunity to inform us about your company. The application helps you to find the right contact person in our purchasing department which saves you further inquiry.

What can you do?

Please fill out our application form if you believe a valuable relationship can be established.

What will we do?

Your request will be directly sent to the responsible contact person in the Purchasing department. We will then contact you.

We appreciate your cooperation!
